Comments: The UAA was conducted in July 2005 and no WBCR was observed. Only 1 of 3 sites evaluated was in the classified segment, and that site was located in the middle of the segment. Although the stream was dry at the site, no evaluation was conducted of a major portion of the segment. Because of this, the committee has insufficient information to make a recommendation.

Committee Recommendation: ☐ Retain Use ☐ Modify Use ☐ Remove Use ☒ Inconclusive
